#### **EXPERIMENT**

#### Title

TOSS AND SCORE

## Description

You are playing a game of Toss and Score in the Hillwood City Mall with your friends. The game consists of the following rules:

Toss an unbiased coin multiple times.

For each heads you get 2 points and for each tails you lose 1 point.

095

The game ends as soon as you get 3 heads in a row, or you toss the coin throughout the length of string S.

You have been given a string 5 consisting of letters H (for heads) and T (for tails) denoting the sequence results you get on the tass of coin N times. Your task is to find and return an integer value representing the final score you get once the game ends.

**Note**: The final score can be negative too.

# **Input Specification:**

**Input1**: A string s. representing the sequence of results you get on the toss of coin N times.

#### Sample Input:

**HHHTT** 

## **Output:**

6

# Source Code:

```
s=input()
scr=0
for i in range(len(s)):
    if s[i]=="H":
        scr+=2
        if s[i-2:i+1]=="HHH":
            break
    elif s[i]=="T":
        scr-=1
print(scr)
```
